

# DriveLight™ Security Software

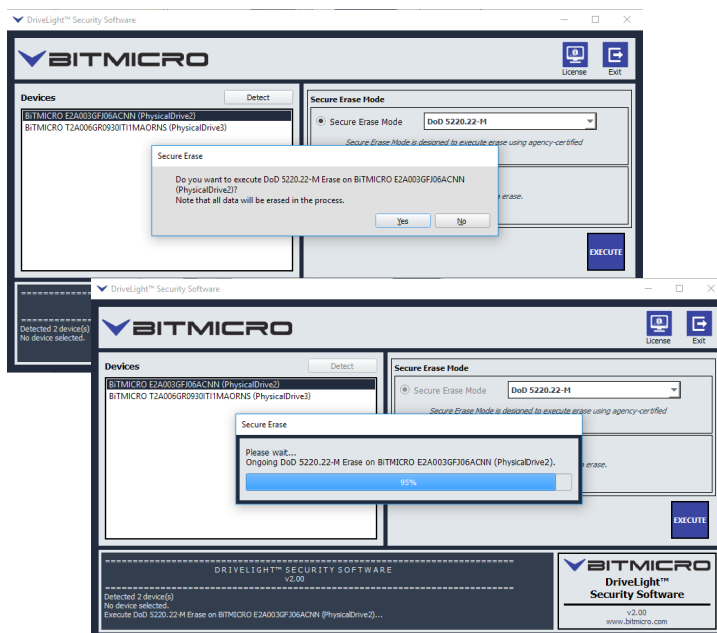

Securely Erase Sensitive Data with Convenient Sanitization Tool

Sanitize sensitive data on BiTMICRO® SATA SSDs with DriveLight Security Software. All sanitize standards are verified using 3rd party utility. DriveLight Security Software features a user-selectable interface which displays all the attached BiTMICRO SATA SSDs. Simply select the required sanitization mode with the SSD you wish to erase, and DriveLight Security Software will do the rest.

DriveLight Security Software is a convenient tool for repurposing BiTMICRO SATA SSDs, minimizing new SSD purchases, and completely erasing sensitive data for compliance with military and other DoD standards.

DriveLight Security Software features key activation through its License section. It also supports BiTMICRO SATA SSDs connected through a UASP-compatible USB to SATA converter.

## Highlights:

- User-Selectable Sanitization Modes
- Verified Military Sanitization Standards
- BiTMICRO SATA SSD Support
- Supports UASP-compatible USB to SATA Converters\*
- GUI or CLI-based Software

## Product Specifications

Features	
Supported SSDs	<ul style="list-style-type: none"> <li>• BiTMICRO SATA SSDs*</li> </ul>
SW Version	<ul style="list-style-type: none"> <li>• GUI-based Software</li> <li>• CLI-based Software</li> </ul>
Supported Sanitization Standards	<ul style="list-style-type: none"> <li>• Instant Erase</li> <li>• NISPOM DoD 5220.22-M</li> <li>• NISPOMSUP Chap 8, Sect 8-501</li> <li>• USA Airforce AFSSI 5020</li> <li>• USA Airforce AFSSI 8580</li> <li>• USA Navy NAVSO P5239-26</li> <li>• USA Army 380-19</li> <li>• NSA Manual 130-2</li> <li>• NSA 9-12</li> <li>• IRIG 106-07 Chap 10</li> </ul>
Key Activation	<ul style="list-style-type: none"> <li>• License Key</li> </ul>
OS Support	<ul style="list-style-type: none"> <li>• Windows</li> <li>• Linux</li> </ul>

\*BiTMICRO maintains a hardware compatibility list (HCL) of UASP-compatible USB to SATA converters.
